

09/44456

1 ABSTRACT OF THE DISCLOSURE

2 Plural protuberances are provided along each side of a  
3 tilt latch or pivot housing. The protuberances each form  
4 an edge that engage an edge of a notch in a window sash.  
5 The protuberances are provided with flexible fingers that  
6 are flexed or sheared by the sash edges to provide a snug  
7 fit.
